About Durapro

Founded in 1997, Durapro specializes in hand tools, pneumatic tools, automotive parts, vehicle lighting, and bicycle related products, mainly serving European markets with nearly 30 years of expertise. As industries rapidly evolve with modern technologies and AI, Durapro is advancing its core strengths and pursuing transformative growth.

About Durapro Magazine

Durapro Magazine is not only a big stride of Durapro but also a world across platform to share our innovation, competency and sustainability, which features a diverse range of topics:

- **Special Topic:** Core strengths, market insights, and product innovations.
- **Durapro Studio:** Innovative applications and industry trends.
- **Durapro Selections:** Curated commodities tailored for specific needs.
- **Durapro ESG:** Our commitment to climate change and sustainability.

Our Inaugural Topic: Getting to Know Durapro

For three decades, Durapro has provided premium products and services to existing clients. Our first issue will give you an overview of Durapro's philosophy and core strengths that drive our success.

01

Special Topic

Getting to know Durapro: An overview of Durapro's strengths and hardworking.

02

Durapro Studio

Robust Supply Chain Support

For three decades, Durapro has delivered quality products and services to current customers, built on the foundation of a robust and comprehensive supply chain. With strong supply chain networks in both Taiwan and mainland China, Durapro efficiently meets the diverse product needs of individual and multiple clients alike.

Container loading

- Shipping to designated warehouses and ensuring secure transportation.

Flexible Shipping Options

Durapro is dedicated to delivering the best service to its customers by maintaining strong and long-term collaborations with upstream suppliers and logistics partners. Regardless of the shipping volume or method, we are capable of flexibly adapting to meet customer requirements, ensuring efficiency and satisfaction.

Technology-Enhanced Value

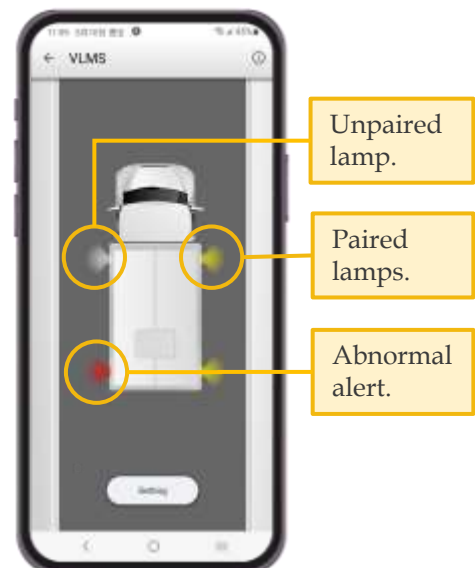

Durapro has been a long-time provider of products for the vehicle aftermarket. However, with the increasing integration of advanced technologies and ADAS (Advanced Driver Assistance Systems) into new-generation vehicles, consumers are often forced to rely on OEMs for parts replacement and repairs. This trend has significantly affected the traditional automotive aftermarket and repair industries.

Committed to innovation and the goal of providing exceptional service, Durapro leverages technology to develop parts compatible with modern vehicle models. By enhancing the safety and usability of its products, Durapro offers consumers better alternatives and helps its customers keep a competitive edge in today's evolving market.

➤ Vehicle-hi : Vehicle Lamp Monitoring System (VLMS)

Vehicle-hi. is a vehicle safety solution including a simple and flexible vehicle safety system and vehicle products which is target to the aftermarket and can be customized to meet your demands.

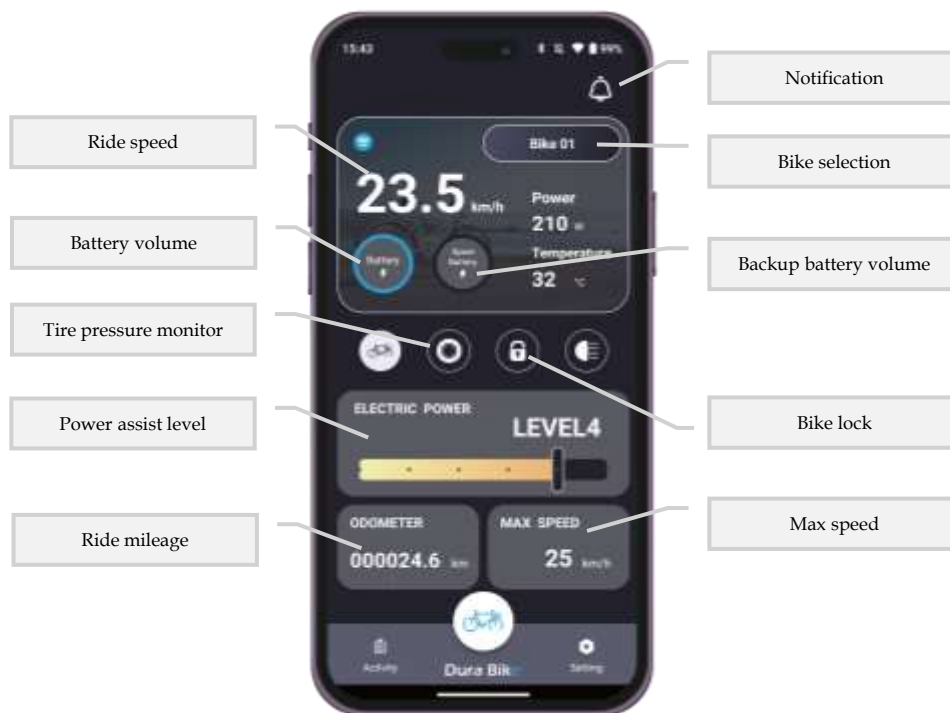

Our module develops lamps for various vehicles, featuring rear lamps, side markers, a 10-30V wide voltage range, and Bluetooth mesh transmission.

➤ Dura Bike : Master your own Ride – Safe, Stylish and Value-added

Dura Bike is a bike app with a series of accessories and devices. It also can be customized depending on demand.

Our accessories include many safety monitoring and stylish devices, so it not only meets your daily riding needs, but also allows you to keep track of the real-time status of those devices at any time. Provide you with a safe, stylish & value-added riding experience.

Smart tail light

Instant lighting for your night riding.

- ✓ Brake sensing
- ✓ Intelligent start-stop
- ✓ Vibration, light sensing
- ✓ COB large aperture
- ✓ Dual support

Durapro Studio

Create an exciting
torque wrench set

The trend of modularization in traditional industries has led to a new demand for customized torque wrench combinations, allowing for the selection of tools based on specific torque requirements.

Durapro Motorcycle Tool Kit – Professional Torque Wrench Set

Designed for motorcycles, this toolkit showcases Durapro's commitment to quality and has won the admiration of customers and their end consumers.

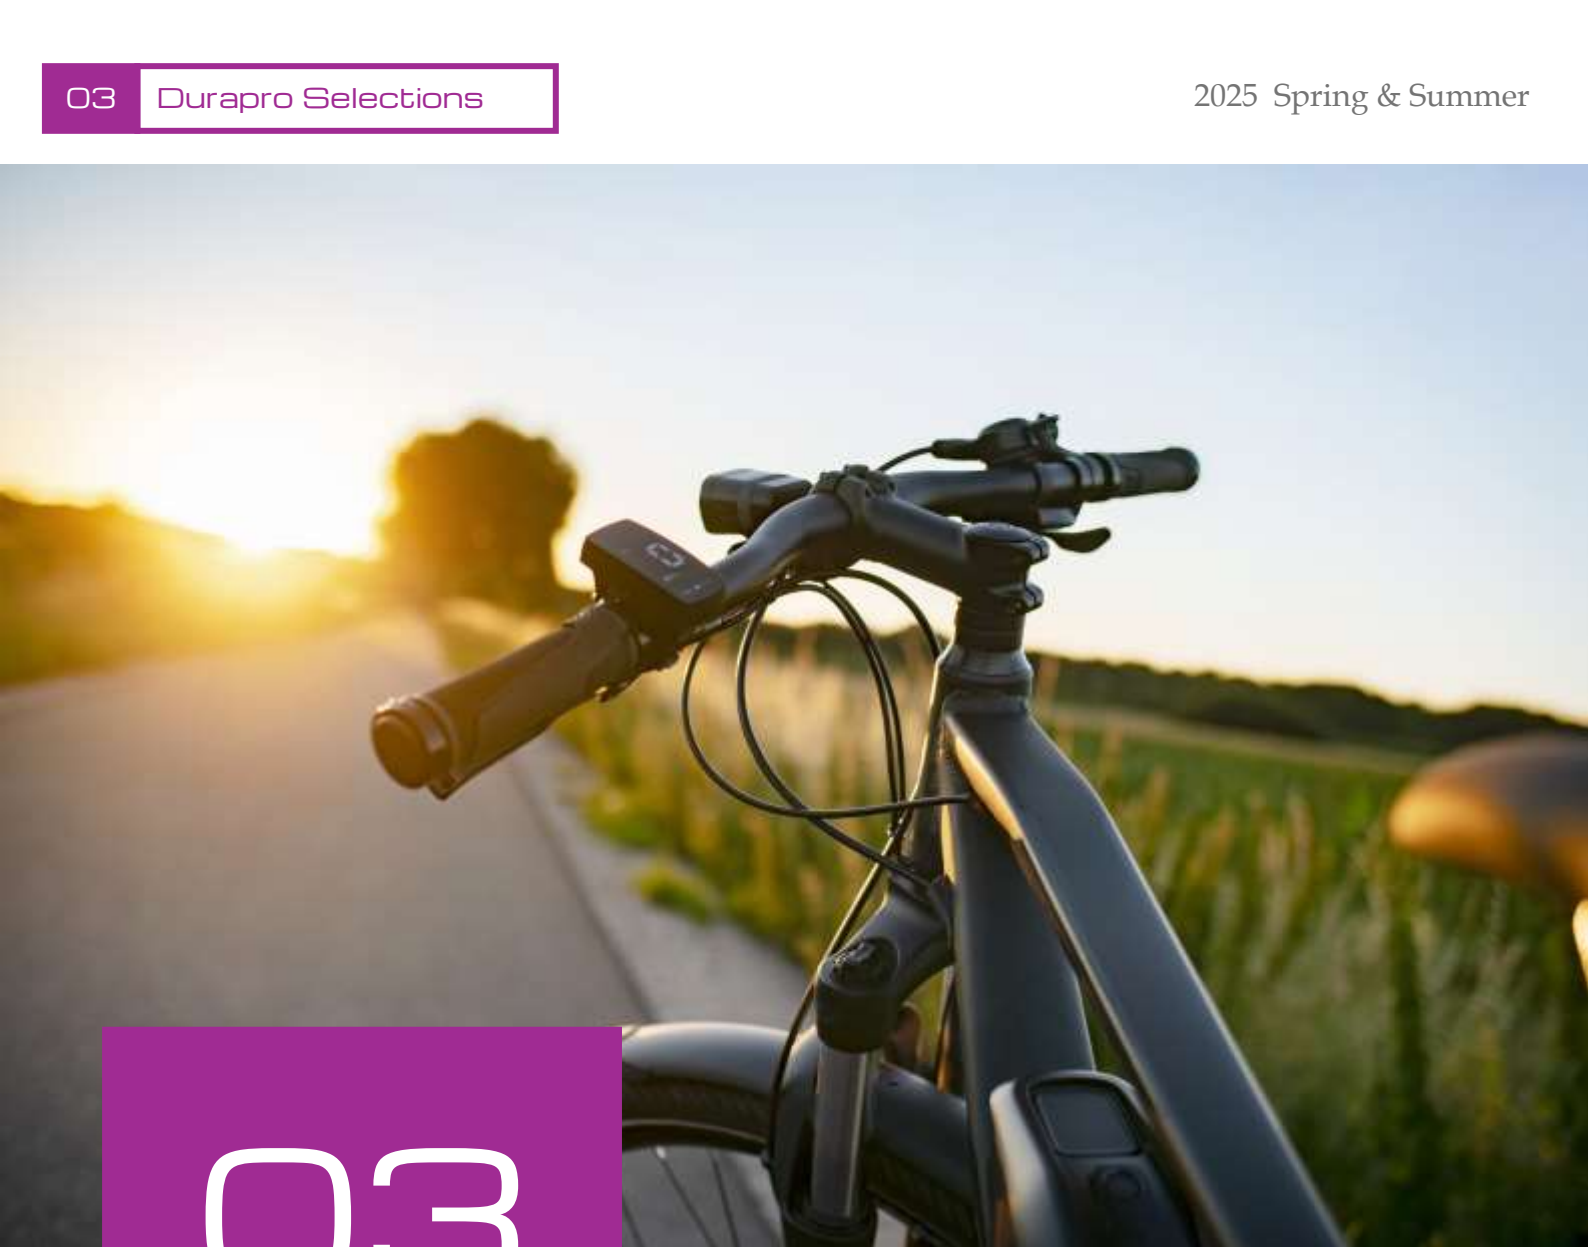

Key Highlights:

- **Customer-Centric Approach:** Prioritizing client needs through professional communication.
- **Innovative Design:** Focused on eco-consciousness, durability, practicality and brand enhancement.
- **Eco-Friendly Materials:** plastic-free, wood lining, ensuring sustainability without compromising functionality.
- **Prototyping Excellence:** Rigorous testing to select suitable materials and craftsmanship.
- **Strict Quality Control:** Seamless integration of suppliers and timely delivery.
- **Reliable Logistics:** DAP model ensures risk-free delivery from factory to warehouse.

Durapro always strives to deliver top-tier solutions by leveraging its strong supply chain, emphasizing sustainability and unique product value to foster lasting customer loyalty. Let me know if you need further refinements!

Durapro Selections

Revolution on Two Wheels:
Transform Your Bike
into an E-Bike

Convert Your Bike into an Eco-friendly Electric Ride.

Transform your bike into an e-bike for a smooth, eco-friendly ride through city streets or countryside trails. It's a cost-effective upgrade that makes your cycling experience easier and greener. Here's how we can help.

Key Advantages:

Compared to other electric bike, we offer three key advantages:

- Easier installation
- Easier maintenance
- Easier replacement

These benefits make our electric bicycle more user-friendly and convenient for long-term use.

We will be attending

2025 Taipei Cycle

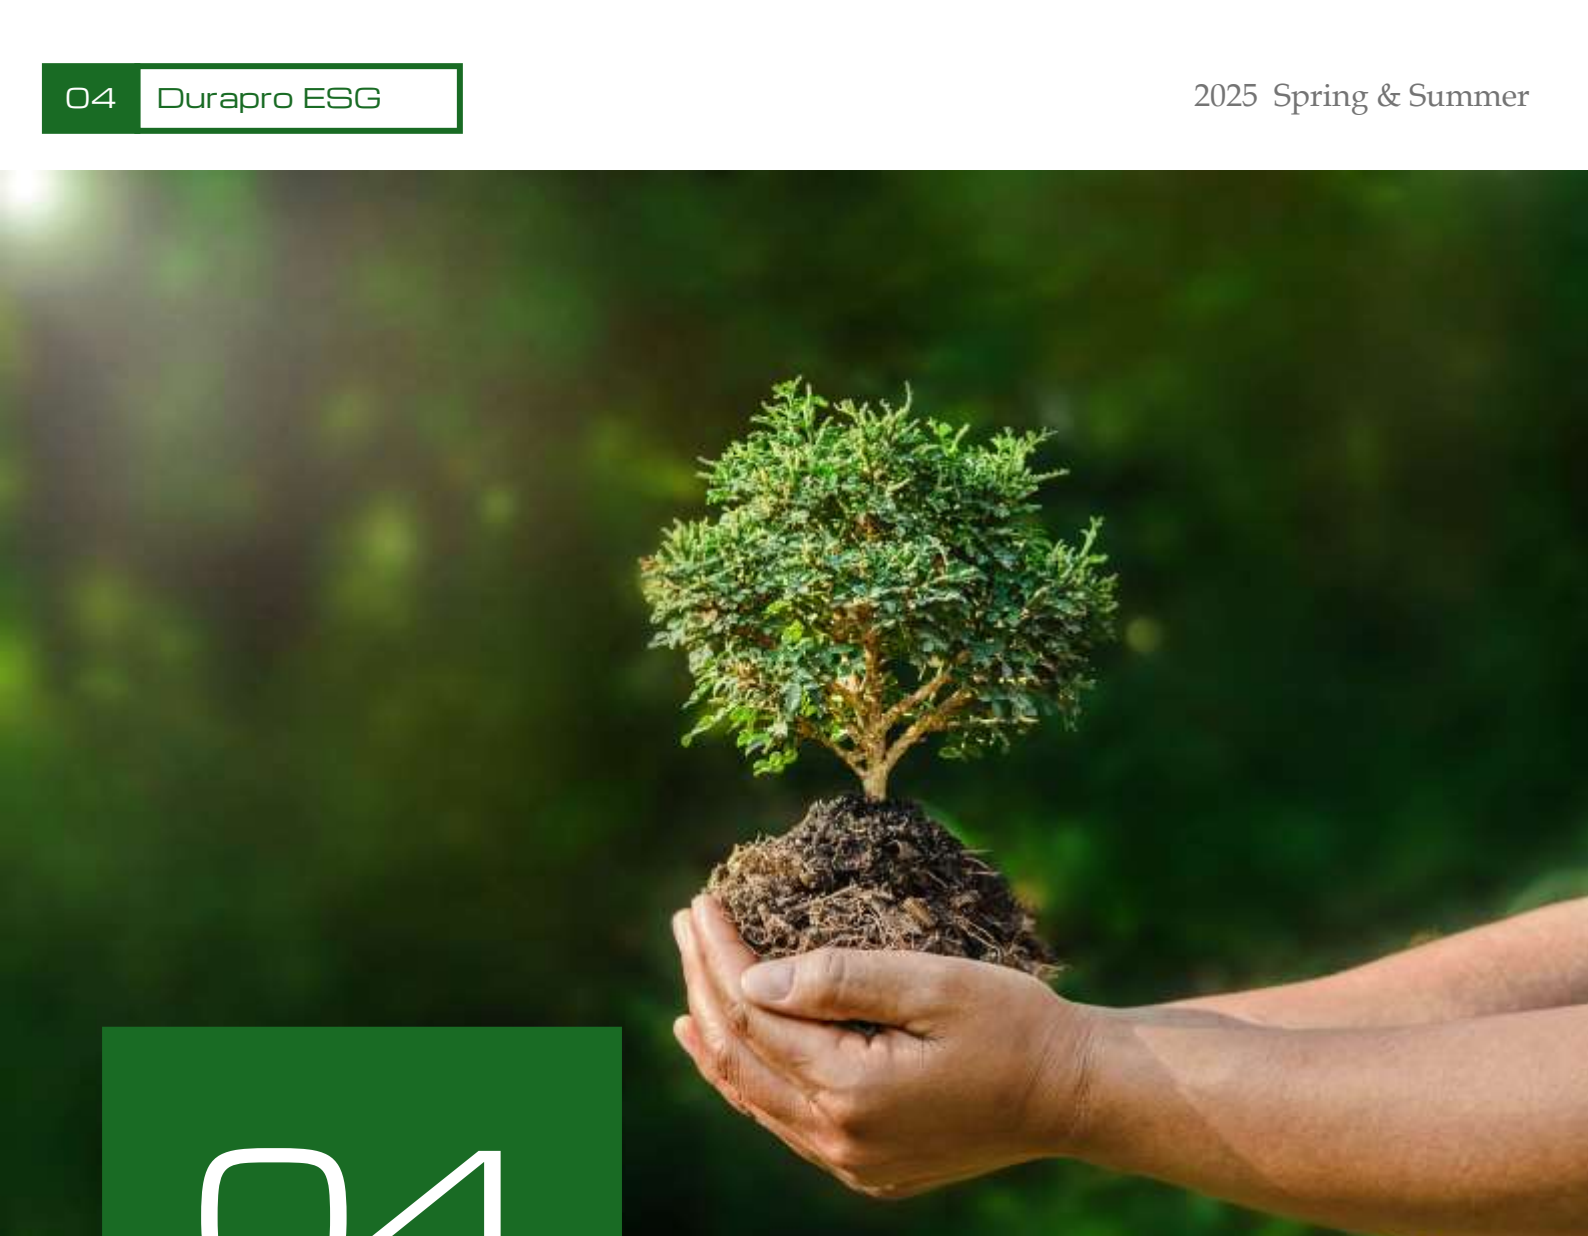

March 26-29 .2025

Please stay tuned

By replacing the entire rear wheel, you can transform your bicycle into an electric bike. In addition to the three advantages mentioned above, the key benefit is that this is a more economical and environmentally friendly option compared to purchasing a new electric bike. Please contact us to get more about the benefits of electric bikes and the detailed steps.

Let's Embrace an Easier e-Bike Lifestyle!

Durapro ESG

An overview of
Durapro's efforts in ESG

Commitment to ESG

Durapro has long been committed to addressing climate change and sustainability issues. Externally, it fosters strong partnerships with customers and suppliers, striving to reduce the carbon footprint of its products. Internally, it has established comprehensive employee evaluation and welfare systems to create a positive, innovative, and harmonious work team.

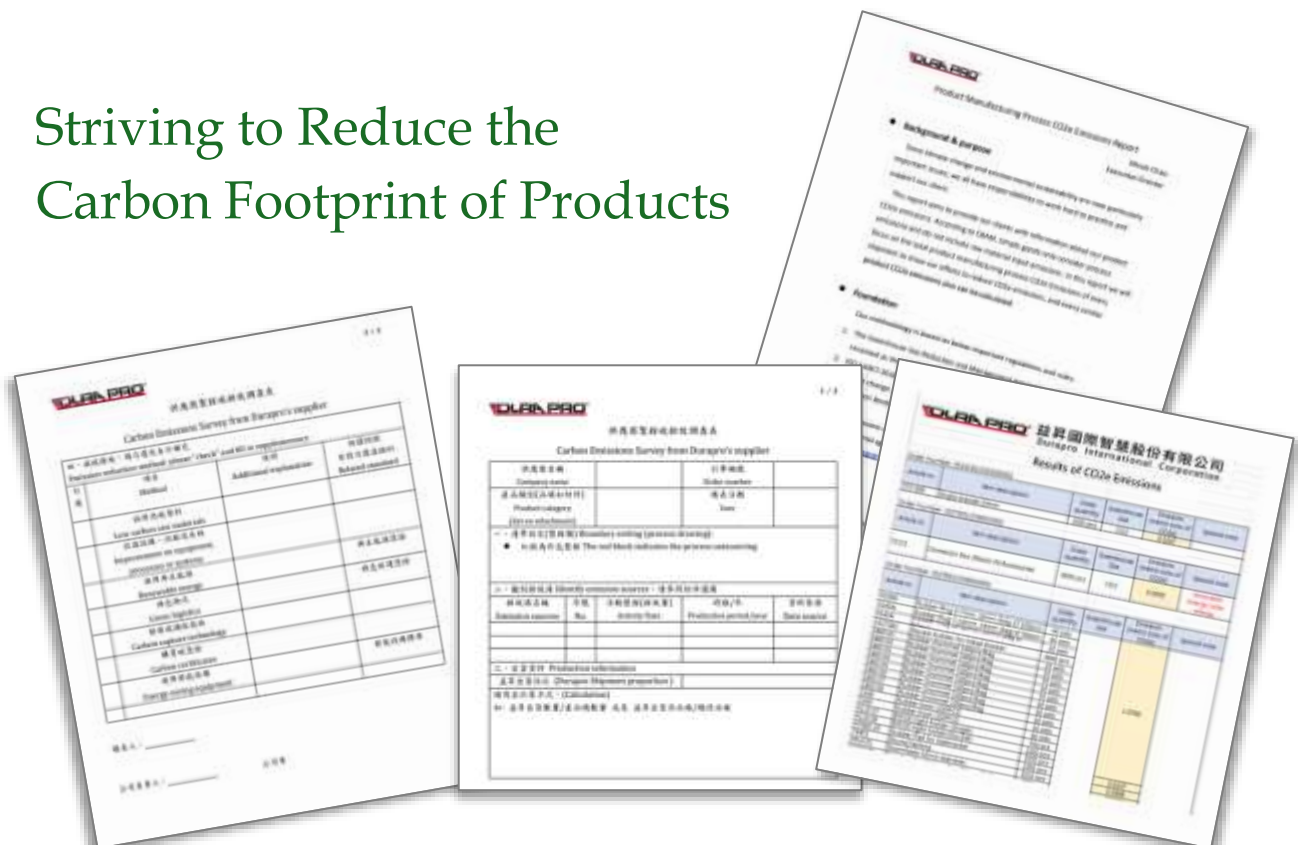

Durapro also actively participates in social welfare initiatives, caring for disadvantaged groups and providing support. The company aims to collaborate with customers, suppliers, and stakeholders to create a sustainable future together.

Strong Partnerships with Customers and Suppliers

Striving to Reduce the Carbon Footprint of Products

A Positive, Innovative, and Harmonious Work Team
