Refinement, Legacy, and Transformation

In recent years, the slowdown and transformation of traditional industries have tested the resilience of many SMEs. Standing firm in our commitment to deliver smart, effective solutions, Durapro continues to enhance its services, create product value, and pursue breakthroughs amid economic uncertainty.

This year also carries special meaning for us. As two veteran executives reach retirement, we honor their pioneering contributions and the spirit of excellence they have passed on. Their legacy strengthens the foundation for a new generation to continue innovating and advancing with confidence.

Guided by the principles of Refinement, Legacy, and Transformation, this issue reflects Durapro's agility, diversity, and vitality — and our enduring promise to be a trusted partner to every customer.

Durapro Motorcycle Tool Kit -
A Legacy Expanded.

Some products carry more than function — they carry a story. The Durapro Motorcycle Tool Kit is one such creation, born from the vision of the retiring managers, whose dedication shaped every detail. Now, as they retire, the legacy continues in a new form: the same professional torque wrench set, now available with additional EVA packaging for enhanced storage — while keeping the classic wooden layer many have come to love.

The EVA foam adds flexibility, protection, and organization, letting users carry and arrange tools in ways the original kit couldn't. It's an upgrade that preserves the toolkit's heritage while embracing modern needs. This thoughtful addition reflects Durapro's commitment to innovation and sustainability, while honoring the toolkit's original craftsmanship.

Past Preserved, Present Enhanced, Future Inspired

This evolution tells a bigger story: how experience, dedication, and care can be passed from one generation to the next. The managers' work lives on, not only in the tools themselves but in the way they adapt and expand, meeting the needs of a new wave of mechanics and riders.

With the Durapro Motorcycle Tool Kit, the past is preserved, the present is enhanced, and the future is inspired, proving that great design can endure while offering new possibilities.

A close-up photograph of a mechanical joint, likely a ball joint, in an engine. The joint is made of polished metal and is connected to a black rubber boot. The background is blurred, showing other engine components.

02

Durapro Studio

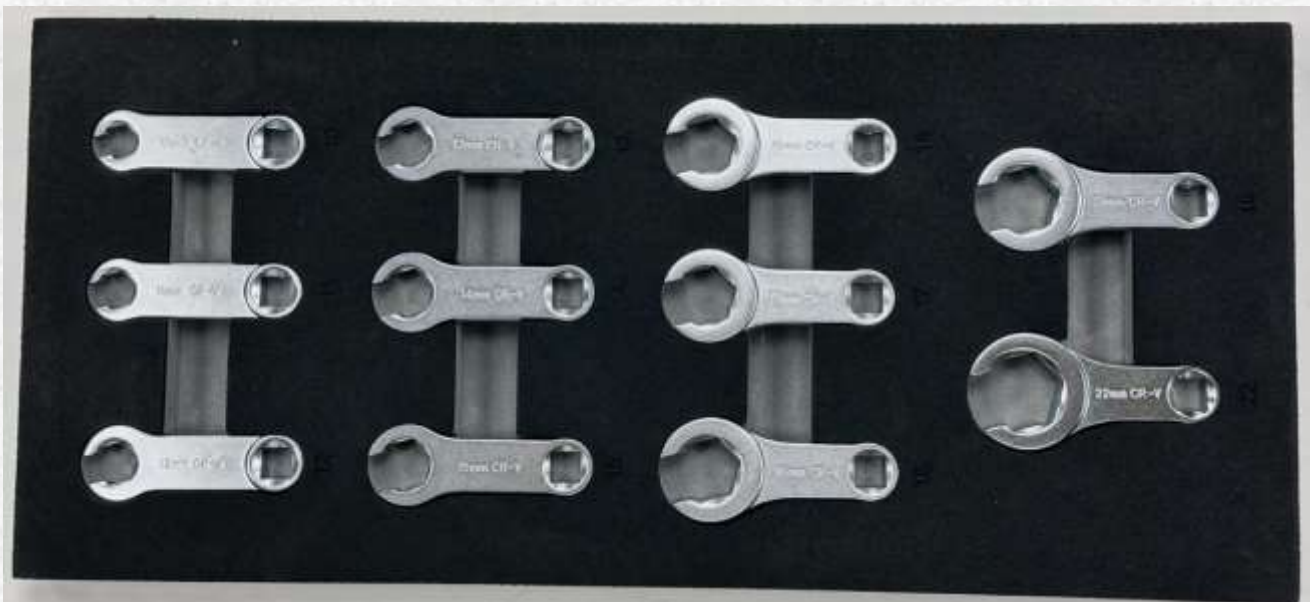

Built for Tight
Spaces Trusted for Precision.

The Science Behind Precision

Designed specifically for confined areas where standard sockets fail, this torque adapter set is made for tight, hard-to-reach spaces.

It extends your reach while maintaining control, allowing accurate tightening even in crowded engine bays or complex machinery.

Beyond the limits of space: Precision through intelligent design.

The Science Behind Precision

Scientific calibration for every extension:

Prevent over-torquing with smart calculation guidance for guaranteed precision on every job.

The Formula

$$T_S = T_A \times \frac{L}{L + A}$$

T_S : Torque Wrench Setting.

T_A : Torque Applied.

L : Length of Torque Wrench (center to center).

A : Length of Extension (center to center).

Tips:

- ✓ To ensure the accuracy of the torque calculation, always keep the adapter aligned at a 180° straight line with the torque wrench.
- ✓ This alignment is essential for the smart calculation guidance to guarantee precision on every job.

Happy Retirement -
With Gratitude and Appreciation

Happy Retirement

To Steve & Vincent

Chapter I – When the Journey Began

Steve Shen

Period of Service

1994~2025

Responsible for Mainland China product sourcing and related matters.

Origins

Steve and Derek first worked together at Shinn-Fu. In 1994, while Derek was assisting Rolf Nilsson, he invited Steve to help prepare for the launch of Durapro. Standing shoulder to shoulder, they navigated 2-3 challenging start-up years that laid the company's foundation.

Vincent Fan

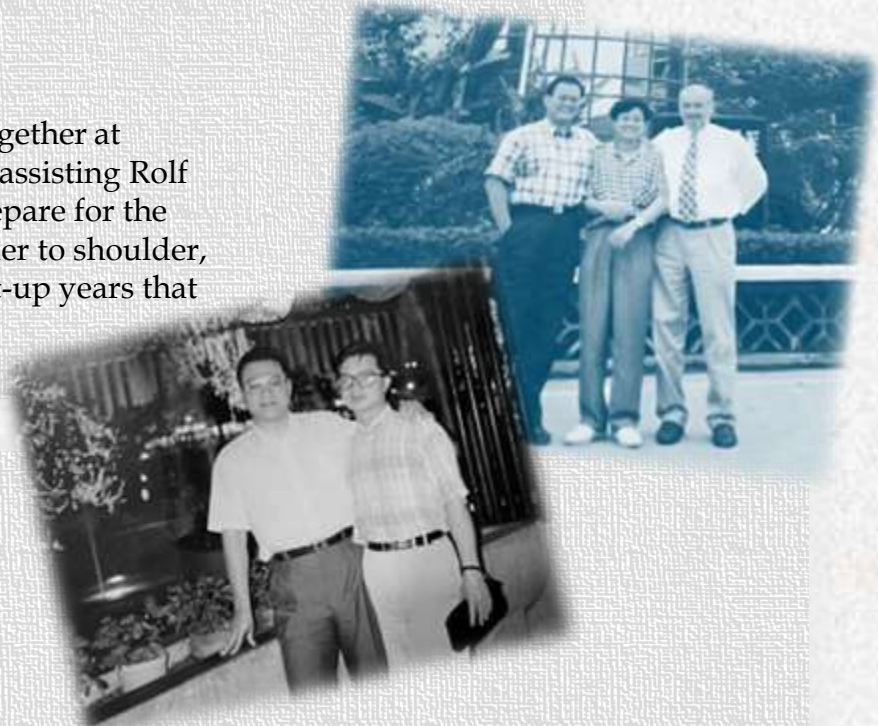

Period of Service

1998~2025

Responsible for Taiwan product sourcing and related matters.

Origins

Vincent and Derek once worked together at Shinn-Fu corporation, where they developed strong rapport and learned from each other. With the warm encouragement of Rolf Nilsson and Derek, the opportunity to co-found Durapro naturally took shape.

Chapter II – Where Effort Became Legacy

With Gratitude to Steve

In those humble beginnings, Steve oversaw product sourcing in mainland China. He took on every task with quiet devotion – living in factories, safeguarding quality, and earning the trust of customers. His perseverance lit the path that helped Durapro take its first true steps.

Through the company's growth, Steve remained steady, earnest, and hands-on. He guided newcomers, strengthened the team, and became a colleague everyone looked up to – a gentle force shaping one of Durapro's most meaningful chapters.

Appreciation for Vincent

In the company's early days, Derek led sales while Vincent managed all purchasing matters, from trade shows to factory catalogues and sample deliveries. He handled it all with dedication and genuine enthusiasm. And, his pursuit of quality sometimes sparked debates with Derek, yet this very insistence on high standards helped Durapro earn its reputation in the industries.

Meanwhile, Vincent's sincere approach to visiting suppliers and fostering trust laid the groundwork for long-term partnerships and the company's steady growth. he witnessed the industry's evolution and passed his experience on to the next generation, strengthening Durapro's foundation for the future.

Chapter III – A Grateful Farewell

Bless & Wishes

From Steve

The struggles of the past have become treasured memories. As I step into retirement, I hope the company grows in size yet stays true heart – customers first, integrity always, building toward a lasting legacy.

To my colleagues: may you find balance between work and family, work with spirit, and keep your dreams alive. May your passion carry the company to new heights.

From Vincent

Looking back on 28 years – from a small team to today's growing organization – I am grateful to have been part of Durapro's journey. Every negotiation, every order, and every partnership with our factories has been a valuable experience.

Thank you to the company for the trust and opportunities, and to all my colleagues for your professionalism, support, and teamwork. As I retire, my hopes for Durapro remain the same: may you continue to build on your strengths and reach new milestones.

Wishing everyone good health, success, and happiness.
